## ABOUT ME

I am a passionate web developer with knowledge of both frontend and backend. I have built multiple projects and also contributed to open-source and internships

## MY PROJECTS

### (1) Airbnb Clone for Property Listings (Full Stack ) 11/2024

- Designed an Airbnb-like clone for users to browse, view, and book rental stays
- Integrated location-based stay listings with filter options
- Technologies Used: MongoDB, Express, Node.js, EJS, Tailwind CSS.

### (2) YouTube Song Browser (Full Stack Clone) 02/2025

- Implemented search functionality using a public API to browse songs and view details.
- Built a clean UI with responsive design for better accessibility on all devices
- Technologies Used: HTML, CSS, JavaScript, Node.js, Express, EJS.

### (3) E-Commerce Website 03/2025

- Developed a full-stack e-commerce platform with product listings, filtering, and cart functionality
- Integrated user authentication and session-based login/logout system
- Used database to store product, user, and order details securely.
- Technologies Used: Node.js, Express, MongoDB, EJS, JavaScript.

### (4) Full Stack Blog Website (In Progress)

Currently building a responsive full stack blog platform where users can create, read, edit, and delete posts. Implementing user authentication, dynamic routing, and a clean UI using modern web technologies

## EDUCATION

### Bachelor of Computer Applications (BCA) 2023-2026

Budaun Institute of management and technology

CGPA: 6.9/10
